Safety Information

About Photosensitive Seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms including: lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms - children and teenagers are more likely than adults to experience these seizures.

The risk of photosensitive epileptic seizures may be reduced by sitting farther from the television screen, using a smaller television screen, playing in a well-lit room, and not playing when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

Other Important Health and Safety Information The Xbox Instruction Manual contains important safety and health information that you should read and understand before using this software.

Avoid Damage to Your Television

Do not use with certain televisions. Some televisions, especially front- or rear-projection types, can be damaged if any video games, including Xbox games, are played on them. Static images presented during the normal course of game play may "burn in" to the screen, causing a permanent shadow of the static image to appear at all times, even when video games are not being played. Similar damage may occur from static images created when placing a video game on hold or pause. Consult your television owner's manual to determine if video games can be safely played safely on your set. If you are unable to find this information in the owner's manual, contact your television dealer or the manufacturer to determine if video games can be played safely on your set.

Unauthorized copying, reverse engineering, transmission, public performance, rental, pay for play, or circumvention of copy protection is strictly prohibited.

CONNECTING

Before you can play Blitz: The League on Xbox Live, you need to connect your Xbox console to a high-speed or broadband Internet connection and sign up for the Xbox Live service. To determine if Xbox Live is available in your region and for information about connecting to Xbox Live, see www.xbox.com/connect and select your country.

Signing In

Before you can access Xbox Live, you'll need an Xbox Live Gamertag. Consult your Xbox Live documentation for instructions on creating a Gamertag. Gamertags are obtained when you create an Xbox Live account. They can be read from your hard disk or a memory unit.

Press the **A** button to go to the Xbox Live Sign In screen. Once you're there, your Gamertag will be displayed. Highlight your Gamertag, then press the **A** button. If your Gamertag is protected by a pass code, you will then be asked to enter your pass code.

CUSTOM TEAMS WHILE PLAYING ONLINE

In order to use your custom teams that you create while playing online, you must be signed in to Xbox Live while creating or updating your teams. This includes playing Campaign and Quickplay games. If you are not signed in while playing a game that will update your team, you will not be able to take your custom team online on Xbox Live.

IMPORTANT

When creating a team, a digital signature is included for purposes of identification that is necessary for online play. In order for you to be able to take your team online into either 'Optimatch' or 'Create A Game' modes, your team **MUST** be created while you are signed in to Xbox Live.

Special Note

Any changes that are made to your team in Campaign Mode (including injuries, upgrades, training, etc.) must be done while signed in to Xbox Live, otherwise, you will no longer be able to use your User-created team in online play. This is so that no hacks, cheats, or modifications can be made to your team offline that may unbalance game play against another online opponent. Being signed in to Xbox Live during Campaign Mode will **NOT** affect your online standings.

On The Field

POSSESSION CIRCLES

Possession Circles appear below some players during gameplay. Player one's character is denoted with a Blue circle and Player two's character will have a Yellow circle. When they have possession of the ball, CPU controlled players have a grey circle. Possession Circles also contain the Turbo Meter.

TURBO METERS

These meters are visible beneath a human controlled player. Turbo Meters start fully charged with the maximum amount of Turbo available. As it's used, the meter diminishes inward. When it's empty, release the **R** trigger (Turbo) to allow it to recharge. Remember, players run slower when you've exhausted all your turbo. Release the **R** trigger, and turbo will recharge.

PLAYER INDICATORS

These colored numbers appear prior to each play, so you'll know the player you're controlling. The numbers correspond to the controller you're using. They'll disappear a few seconds after players are set.

RECEIVER BUTTONS

Each receiver has a controller button (**A**, **Y** or **X**) attributed to them. Pre-snap, press the **●** button to show the play or press the **○** button to show the field. Before a pass, look down field, then press the button displayed over the receiver you want to receive the pass.

For each formation, there several pages of plays. Press the D-pad **↑** or **↓** to move through the pages of plays. Each play is represented by the **X** button, **A** button or **Y** button. NOTE: Taunting sacrifices speed, so make sure you won't be tackled. If you're tackled while taunting, you'll stand a greater chance of fumbling.

JUMP PASS

Press the **●** button right before throwing the ball to make your Quarterback leap in the air before throwing. A successful Jump Pass can help you hurdle would be tacklers!

On The Field

CLASH METER

The Clash Meter shows how long you can stay in Clash Mode. The bar drains when you hold down the **L** trigger on offense and when you execute a Dirty Hit on defense. It can be replenished with big plays on the field.

Below the Clash Meter, the Clash Icon Meter counts how many Clash Icons you've collected (for more information on Clash Icons, next page). Once you illuminate all six icons, you'll be rewarded by entering Unleash Mode. The meter will then transform into an Unleash Meter.

CLASH MODE - OFFENSE

Clash Mode gives the offense an advantage by slowing down the defense. It also makes offensive moves more powerful, including power moves, evades, and catches. These combos also award you with valuable Clash Icons. Enter Clash Mode by holding down the **L** trigger. You can always regain Clash by gaining yards, scoring touchdowns and making big plays.

CLASH MODE - DEFENSE

Clash Mode on defense amps up your hits. Hold down the **L** trigger to use your Clash Meter when you perform a hard hit (**A** button) to pummel the opponent with a Dirty Hit. Dirty Hits are more apt to cause fumbles and will also award you with Clash Icons. Using your Clash on defense will not cause a blur effect. Instead, it will only deplete when the hit is successful. Successful hits reduce the victim's stamina, displayed by a number above his head. This lowers their abilities, making them more prone to injury.

UNLEASH MODE - OFFENSE

When you've accumulated six Clash Icons, your Clash Bar will transform into an **UNLEASH BAR**. Unleash Mode is triggered just like Clash (hold **L** trigger). Once you perform a special move in Unleash Mode, you will exhaust all of your Unleash Energy. Unleashing on offense amplifies your moves and gives you a few seconds of invulnerability. To use a QB Unleash, tap the right analog stick to perform an evasion. You cannot Unleash a QB unless he's in the backfield and the right analog stick is tapped toward the defender while holding down the **L** trigger. As the ball carrier, press the Evade or Power button to perform Unleash versions of those moves. When the ball is in the air, enter Unleash mode and press the **Y** button to perform an Unleashed Catch. **WARNING:** You get only one Unleash Move. Once you use it, or run out of Unleash Energy, you'll drop back into Clash Mode.

UNLEASH MODE - DEFENSE

When you're in Unleash Mode on Defense, your Dirty Hits have a great chance of causing a fumble or injuring an opponent. When your team is in this mode, hold the **L** trigger to use your Unleash energy then press the **A** button to attack with an Unleashed Dirty Hit. Successfully performing an Unleash Hit will exhaust all of your Unleash energy.

INJURIES

Players can sometimes be injured on the field. When this happens, an image of an injury appears, followed by two options. You can select to **TRAIN** the injured player or **JUICE** him.

Juicing an Injured Player

When you Juice a player back into playing condition, he can return sooner than he would if he was treated. Be aware, though, there's a higher risk that more injuries could occur to the player.

Treating a Player Back to Health

If you don't choose the short term solution, Treating a player back to health will ensure a stronger injury recovery. Of course, you sacrifice time.

THE KICKING GAME

You control all aspects of the Kicking Game. Kickoffs, Punts, PATs and Field Goals are up to you. When you choose to kick, the Kick Meter appears. Prior to kicking, a series of buttons are displayed inside the Kick Meter. As a button appears, immediately press that button. Kicking depends on your ability to hit the buttons quickly and accurately. You can also spook the kicker by pressing the **Y** button before the snap. This will vibrate your opponent's controller.

NOTE: When kicking field goals, PATs or Punts, try to correctly press better than 49 percent of the buttons. Otherwise, the snap can be fumbled.

Field Goal & PATs

When you're attempting a field goal, the length of the field goal will determine how many of the buttons you'll need to press prior to the snap of the ball. For example, if you're in close, you may have to press as few as four buttons for a field goal. If you're attempting a long distance field goal, you may have to press as many as seven buttons. The success of a field goal depends on the skill level of the team and/or the kicker. In Campaign Mode, you can increase your chances of success by upgrading your kicker's skill level through training.

Onside Kick

When you attempt an Onside Kick, the percentage determines how likely the other team will fumble the ball after receiving the kick.

On The Field

BRAWLING

With increasing amounts of Dirty Hits or Unleash Hits on offense, players become more irritated. You'll eventually see the words **"TEMPERS FLARING"** display, followed by two helmet icons. With the helmet icons displayed, the next Dirty or Unleashed Hit will cause a brawl.

Brawls last 10 seconds. The player that gets the most Late Hit icons during a Brawl will get to keep them. The player that loses gets nothing. It's a great way to build up your Unleash Meter!

PAUSE OPTIONS

During the game, press the **PAUSE** button to view the Pause Options screen. You can view the Player Icon Legend by pressing the **INFO** button.

INSTANT REPLAY

If you make a great play, take a look at the replay. Use on-screen controls to view the play.

CHALLENGES
